PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of professional experience building responsive, high-performance web applications with React.js, Next.js, and TypeScript. Specialized in translating complex, multi-role product requirements into clean, accessible, and scalable user interfaces — from role-based dashboards and government portals to e-commerce and healthcare platforms. Strong command of modern state management and data-fetching patterns (Redux, Zu stand, React Query, GraphQL) and REST/GraphQL API integration, with a focus on reusable component architecture, pixel-accurate UI implementation, performance optimization, and maintainable code. Comfortable collaborating closely with UI/UX designers and backend teams in remote, agile environments.

CORE COMPETENCIES

- **Frontend Frameworks:** React.js, Next.js (App & Pages Router, SSR/SSG/ISR), React Native (UI features)
- **Languages & Markup:** TypeScript, JavaScript (ES6+), HTML5, CSS3
- **State & Data:** Redux / Redux Toolkit, Zu stand, React Query, GraphQL (Apollo), REST API integration
- **Styling & UI:** Tailwind CSS, Material UI, Bootstrap, responsive & mobile-first design, Chart.js data visualization
- **Engineering Practices:** Reusable component architecture, code splitting & performance optimization, cross-browser compatibility, accessibility, form validation, unit testing with Jest
- **Tools & Workflow:** Git & GitHub, Figma-to-code handoff, code reviews, Agile/Scrum, MS Office

STRENGTHS

• Responsive & mobile-first UI
• Reusable component architecture
• Performance & Core Web Vitals
• Pixel-accurate Figma handoff
• Accessibility & clean code
• Agile, remote collaboration

PROFESSIONAL EXPERIENCE

Frontend Developer

Nov 2023 – Oct 2025

ALIMCOSOFT (SMC-Private) Limited · Islamabad, Pakistan

- Built and maintained responsive, production-grade web applications in Next.js and React.js, delivering multi-role interfaces for admin, vendor, seller, and customer users.
- Converted Figma designs and complex product requirements into pixel-accurate, reusable component libraries, improving UI consistency and delivery speed across projects.
- Integrated REST and GraphQL APIs with React Query and Redux, handling caching, pagination, optimistic updates, and robust loading and error states.
- Improved application reliability and reduced UI-related downtime by roughly 15% through defensive rendering, form validation, and unit testing of core components.
- Optimized page performance with SSR/SSG, lazy loading, and image and bundle optimization, improving load times and Core Web Vitals.
- Collaborated daily with UI/UX designers and backend engineers, and conducted regular code reviews to enforce coding standards and frontend best practices.

SELECTED PROJECTS

Tareeq Ul Shifa — Healthcare & Pharmacy Platform

Developed the frontend of a multi-role healthcare platform (admin, pharmacy sellers, customers) for browsing and purchasing medicines and health products. Built the Next.js web application and React Native mobile UI features, implemented role-based navigation and authentication flows, product search and filtering, cart and checkout screens, and integrated REST APIs with React Query and Redux for reliable, scalable data handling across all roles.

Tech: *Next.js, TypeScript, Tailwind CSS, Redux, React Query, React Native, REST API integration*

Live: *tareequlshifa.com*

NEECA Portal — Government Multi-Role System

Led frontend design and implementation for a 5-role government portal (Admin, Vendor, Lab, Printing Firm, Customs). Architected the component structure and role-based dashboards, built complex multi-step forms, data tables, and approval workflows, and integrated GraphQL queries and mutations with Redux state management to deliver an intuitive, consistent user experience.
Tech: *Next.js, TypeScript, Tailwind CSS, Redux, GraphQL, REST API integration*
Live: *management.neers.com.pk*

Tracker — 3-Role Enterprise Portal

Led development of core frontend components for a comprehensive enterprise portal, prioritizing reliability with unit tests for critical UI logic. Designed and built application pages, shared component libraries, and dashboard views, integrated REST and GraphQL endpoints, and managed application state with Redux for predictable, optimized data flow.
Tech: *Next.js, TypeScript, Tailwind CSS, Redux, React Query, GraphQL, REST API integration, Jest*

Maaoz Official Store — E-Commerce Platform

Developed a responsive multi-role e-commerce frontend (admin, seller, customer) covering product listings, filtering, cart and checkout flows, order management, and admin dashboards with Chart.js analytics. Implemented authentication and protected routes on the client, plus UI for subscription-based recurring orders and exclusive deals.
Tech: *Next.js, TypeScript, Tailwind CSS, Redux, React Query, Chart.js, REST API integration*
Live: *maaozofficialstore.shop · admin.alimcosoft.com*

Money in Battle — Gaming Balance Platform

Built a responsive website for managing in-game balances and rewards using Next.js and TypeScript, with Redux state management and REST API integration via Back4App for real-time data handling and smooth, responsive user interactions across devices.
Tech: *Next.js, TypeScript, Redux, Tailwind CSS, REST API, Back4App*
Live: *moneyinbattle.com*

Freedom Elite Funding — Funding Platform (Freelance)

Delivered an end-to-end freelance project as frontend developer, building the marketing and application UI components in Next.js, wiring up third-party integrations and Next.js API routes, and handling production deployment on AWS EC2.
Tech: *Next.js, Tailwind CSS, Next.js API routes, AWS EC2*
Live: *freedomelitefunding.com*

PolarPro — E-Commerce Store (Photography Gear)

Contributed frontend components and store integrations for an e-commerce platform selling premium photography and videography gear, including camera filters, lenses, and drone accessories. Built responsive product and collection pages and improved the browsing and checkout experience.
Tech: *Next.js, Redux, Tailwind CSS, GraphQL, REST API integration*
Live: *polarpro.com*

Corbett Valley — Resort & Hospitality Website

Built a responsive marketing and booking-enquiry website for a riverside resort near Jim Corbett National Park, with image-rich gallery layouts, room and package listings, activity pages, and SEO-friendly server-rendered pages.
Tech: *Next.js, Redux, Tailwind CSS, GraphQL*
Live: *corbettvalley.com*

Resorts Valley — Resort & Hospitality Website

Built a responsive marketing and booking-enquiry website for a riverside resort near Jim Corbett National Park, with image-rich gallery layouts, room and package listings, activity pages, and SEO-friendly server-rendered pages.
Tech: *Next.js, Redux, Tailwind CSS, GraphQL*
Live: *resortsvalley.com*

EDUCATION

BS Software Engineering

2018 – 2022

Islamia College University, Peshawar, Pakistan
